

# ConfigNet™

## Create a Digital Home without programming:

1. Digital Home Configuration and Management
2. User interface creation
3. Home automation scene creation

Superna ConfigNet™ is an easy-to-use desktop software suite that enables the creation, maintenance and management of your Digital Home solution. Follow the simple and intuitive wizards as they guide you step by step through configuring your smart home. Upload the configuration data over your wired or Wi-Fi home network and you are ready to go. No custom programming is required!

The Superna mission is to create standards-based software and hardware products that will make home automation accessible and affordable to everyone. Superna is committed to exceeding the expectations of our customers and to continuing our pioneering spirit by developing the latest products, systems and services. With Superna, everything is under control!™

- Easy to learn and use
- Simple configuration for 3rd party products
- Onsite or offsite management

**Now available  
for VISTA!**

**Superna**  
everything is under control

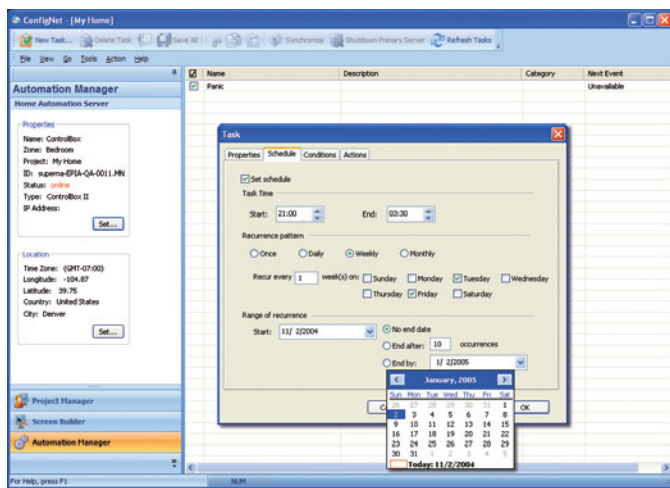

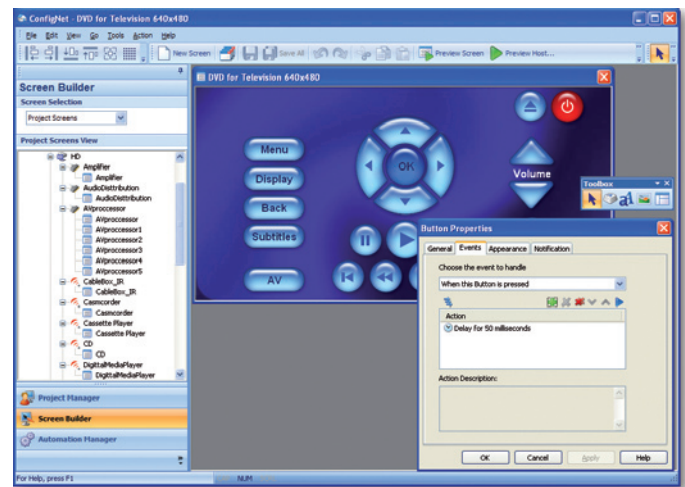

## Project Manager™

Project Manager reduces your installation complexity and time. It allows you to easily configure a new Digital Home project; you can add, remove or reconfigure devices with just a few clicks. Use the device drivers from our extensive database or use our codeless driver creation tool for adding new ones.

## Screen Builder™

Create your own personalized user interface or simply let ConfigNet™ generate screens for you automatically. Using Screen Builder, you can customize your device screens as much or as little as you like. Adding or removing elements or changing the background image is as easy as point and click. Our wizards and dialog boxes help create programmable buttons and scenes with ease.

## Automation Manager™

Using the Automation Manager to create home automation tasks is as easy as using your computer's calendar. Simply pick your time and/or event based conditions, select your desired actions, and you are ready to go. Make your home smarter within minutes.
